212	350	512	675	837	1000	225	375	550	725	900	1075

A linear cord is 128 cu ft. or 2 stacks of wood 4 ft high and 8 ft long with each stack having its logs cut into 2 ft wide pieces. (4 x 8 x 2 = 64 cu ft or 1/2 cord x TWO stacks = 128 cu ft or 1 cord.)

Ours is NOT a true linear cord cause we (like most companies) cut our pieces 18 - 20 inches in length (not 24). The rationale: most clients do not want 24 in. pieces because of wood burning stoves or fireplace inserts. Thusly, our two stacks will not measure side to side 48 inches or 4 ft. C.J.'s **GUARANTEES: ALL SEASONED HARDWOOD**, stacks 4 ft high and 8 ft long, but not 2 ft wide (1/2 c) or 4 ft wide (1c)
